

Personal Profile

Creative front-end developer with 3+ years of industry experience. I take pride in designing and developing websites and web apps that provide the end user with a solid end product that is accessible to their needs and drives growth for the business in the areas they require.

I am seeking an opportunity that would advance my skill set in the development industry and give me the next challenge that I strive for.

Work Experience

- **Aug 2018 - Present**
Web Integrations Ltd - Front-end Developer
In my current role, I have been refining my front-end skills along with learning more about back-end and working with servers. I have worked on a range of sites from brochure to larger e-commerce sites, legacy and new. I have also been designing new sites for clients and re-designing larger sites to update the experience for the user.
- **Aug 2017 - Aug 2018**
MTC Media - Front-end Developer
The experience I gained from working at MTC will stay with me for life. I gained a substantial amount of knowledge and skills in web development, working with clients and within our own team. The projects I worked on ranged in size from small businesses right up to large e-commerce sites for Brewdog and Aberdeen Football Club.
- **Jul 2016 - Aug 2016**
Fifth Ring - Digital Intern
Whilst at Fifth Ring over summer, I worked alongside the digital team on designing new websites and altering existing work. I also developed new concepts and finished up production ready designs for presenting to clients. On my first day, I was working on a new design for a client's website which was used in the final product.
- **Jun 2016 - Jul 2016**
AVC Media (now known as AVC Immedia) - Placement
AVC gave me the project of working on the redesign of a web app for tracking live football scores in different tournaments across the world. I produced the front end of the application whilst another person in the team worked on the back end. The team also gave me experience in video editing and 3D animation.
- **Nov 2013 - Apr 2014**
Studio NEC - Intern
I worked with Studio NEC once a week as an intern. In the 16 weeks I was there for, I designed potential websites and logos for clients. I was also trained and shown what it is like to work in the design industry.

Skills

I am proficient in using the Adobe and Microsoft Office suites. Alongside this, I have strong web development skills using the latest technologies such as HTML5, SCSS, JS (ES6), Vue and PHP.

The sites I work on are built using a LAMP stack working with CMS' such as SilverStripe, Craft and WordPress.

I have valuable skills in UI and UX design and I always consider accessibility in this process to allow all users on the web to have a worthwhile experience.

Keeping control of workflow is a must which is why I use GitHub to have full control over the projects I am working on along with PHPStorm, my go to IDE.

Achievements

BSc (Hons) Digital Media Class Prize

I was awarded the class prize for academic excellence in my final year at university.

MTC Media - Dundee United Football Club

I worked alongside a blind supporter in redeveloping the accessibility of the DUFC website to require his access after the site was redesigned. This was a great achievement for me as it felt very rewarding and it allowed me to prove my skills as it was one of the first jobs I was given when I joined the company.

Projects

A selection of projects that I have worked on:

Aberdeen Football Club
